

BOOTH 2204

NAVIGATING SUPPLY CHAIN CHALLENGES

RILA THE RETAIL
SUPPLY CHAIN
CONFERENCE
LINK 2022

FEBRUARY 20-23
DALLAS ★ TX

DLN
INTEGRATED
SYSTEMS, INC.

**OUR BUSINESS IS
MAKING SURE YOUR
BUSINESS IS
RUNNING
SMOOTHLY.**

Nice to meet you!

We are an independent systems integrator that always does what they say they'll do & treats you like a partner.

Stop by Booth 2204 and learn how we can help solve your logistics challenges with our System Audit or get more in depth with an Engineering Study.

OUR APPROACH

It all starts with listening.

1 LISTEN

What is your current situation? What are your goals? We listen to hear everything you want in your system.

2 UNDERSTAND

Budget, timeline, decision-makers and who else should be involved in the project are all important for us to understand.

3 ANALYZE

We'll analyze the data we've gathered to develop our next steps. We want to be sure we can show a solid ROI and how soon this will occur.

4 CONCEPT

Once our analysis bears out, we will begin conceptualizing designs to present for client team review.

5 ENGINEER

We will engineer the selected concept, making tweaks along the way as needed with the team's input.

6 IMPLEMENT

DLN will implement the facility plan, purchasing and installing equipment in the new or existing facility.

7 COMMISSION

Our team works hand-in-hand with the client team to ensure the new system is running smoothly and everyone is trained on the new equipment.

8 SERVICE

The DLN Service team offers ongoing support in the form of 24/7 system down repair, PM, spare parts and more.

Flexibility, Speed, Reliability

DLN is well positioned to apply cutting edge technology providing the best solutions for our clients.

Combining the proper balance of automation to achieve the necessary performance and function is critical in order to operate the distribution center efficiently.
