

A TRUSTED PARTNER ENHANCING YOUR COMPETITIVE EDGE WITH ADVANCED DISTRIBUTION SOLUTIONS

Building a Solid Foundation

- Setting the right strategy with a sound business case
- Designing and modeling an optimal operation to meet future requirements
- Selecting the right technology

Managing and Executing Creative Solutions

- Leveraging our technical expertise
- Coordinating multiple vendors and crews
- Detailed controls & software deployment
- Careful testing and commissioning

Providing Continued Support

- Own 24/7 technical support
- Spare part and technicians' deployment as needed
- On-site assistance to augment your maintenance team

Our Approach

DISCOVERY

We listen to your needs, assess your operations and analyze your data to create a strategy that will generate results.

CONCEPTUALIZATION

We will develop a design that optimizes your footprint, and present benefits and financials to support the business case for system improvements.

REFINEMENT

Visualize your design with renderings and virtual tours, providing our engineers feedback on ways to improve your system design.

IMPLEMENTATION

Our team will procure the most effective equipment for your design, then install and commission your new system.

LIFECYCLE SERVICE

Get 24/7 support, on-site service and full preventive maintenance programs to keep your system running smoothly.

WE CAN HELP

DLN has a 20 year track record optimizing distribution and fulfillment operations for grocers and food service companies.

Our team of engineers can provide a data-driven roadmap for growth, design and build a new facility, or improve existing distribution operations with upgrades or automation.

From start to finish, our team of engineers can help you save time, money and labor.
